New Business Developments

A. Fleet Renewal

I. Vessel Acquisitions

- In December 2019, we acquired three 4,258 TEU capacity sister containerships (2010-built *Vulpecula*, 2010-built *Volans* and 2009-built *Vela*).
- In January 2020, we acquired the 2009-built, 4,258 TEU capacity containership JPO Virgo.

• We acquired all four vessels using cash in hand and we are currently in advanced discussions with a leading European financial institution for their financing.

II. Vessel Disposals

- In October 2019, we sold the 1991-built, 2,023 TEU capacity containership Sierra II.
- In November 2019, we sold the 1992-built, 2,024 TEU capacity containership *Reunion*.
- In December 2019, we sold the 1991-built, 2,023 TEU capacity containership Namibia II.
- In January 2020, we agreed to sell the 2000-built, 1,645 TEU containership *Neapolis*. The sale is expected to be concluded by the end of January 2020.

B. New Financing Agreements

• We have entered into four separate loan agreements with leading European and U.S. financial institutions for a total amount of up to \$265 million. The loan proceeds have been used for the refinancing of the existing indebtedness of four 2017-built, 11,010 TEU containerships (acquired under our JV with York Capital Management) and for general corporate purposes. The new facilities will be repayable over 5 years.

C. Dividend announcements

- On January 3, 2020, we declared a dividend for the quarter ended December 31, 2019, of \$0.10 per share on our common stock, payable on February 5, 2020, to stockholders of record of common stock as of January 21, 2020.

Mr. Gregory Zikos, Chief Financial Officer of Costamare Inc., commented:

"During the fourth quarter and the year, net income and earnings per share increased substantially boosted by higher charter rates and the addition of new ships.

As part of our fleet renewal program, we acquired four panamax vessels with an average age of about 11 years during the quarter and disposed of an equal number of ships with an average age of 27 years.

During the year larger vessels enjoyed a rising charter market and today there is limited supply available in the post -panamax sizes.

We have 18 post -panamax ships coming off charter over the next twelve months, which positions us favorably, should market momentum continue."

Non-GAAP Measures

The Company reports its financial results in accordance with U.S. GAAP. However, management believes that certain non-GAAP financial measures used in managing the business may provide users of these financial measures additional meaningful comparisons between current results and results in prior operating periods. Management believes that these non-GAAP financial measures can provide additional meaningful reflection of underlying trends of the business because they provide a comparison of historical information that excludes certain items that impact the overall comparability. Management also uses these non-GAAP financial measures in making financial, operating and planning decisions and in evaluating the Company's performance. The tables below set out supplemental financial data and corresponding reconciliations to GAAP financial measures for the three-month periods and years ended December 31, 2019 and 2018. Non-GAAP financial measures should be viewed in addition to, and not as an alternative for, voyage revenue or net income as determined in accordance with GAAP. Non-GAAP financial measures include (i) Voyage revenue adjusted on a cash basis (reconciled above), (ii) Adjusted Net Income available to common stockholders and (iii) Adjusted Earnings per Share.

⁽²⁾ Voyage revenue adjusted on a cash basis represents Voyage revenue after adjusting for non-cash "Accrued charter revenue" recorded under charters with escalating charter rates. However, Voyage revenue adjusted on a cash basis is not a recognized measurement under U.S. generally accepted accounting principles ("GAAP"). We believe that the presentation of Voyage revenue adjusted on a cash basis is useful to investors because it presents the charter revenue for the relevant period based on the then current daily charter rates. The increases or decreases in daily charter rates under our charter party agreements are described in the notes to the "Fleet List" below.

⁽³⁾ Adjusted Net Income available to common stockholders and Adjusted Earnings per Share are non-GAAP measures. Refer to the reconciliation of Net Income to Adjusted Net Income.

"Accrued charter revenue" is attributed to the timing difference between the revenue recognition and the cash collection. However, Adjusted Net Income available to common stockholders and Adjusted Earnings per Share are not recognized measurements under U.S. GAAP. We believe that the presentation of Adjusted Net Income available to common stockholders and Adjusted Earnings per Share are useful to investors because they are frequently used by securities analysts, investors and other interested parties in the evaluation of companies in our industry. We also believe that Adjusted Net Income available to common stockholders and Adjusted Earnings per Share are useful in evaluating our ability to service additional debt and make capital expenditures. In addition, we believe that Adjusted Net Income available to common stockholders and Adjusted Earnings per Share are useful in evaluating our operating performance and liquidity position compared to that of other companies in our industry because the calculation of Adjusted Net Income available to common stockholders and Adjusted Earnings per Share generally eliminates the effects of the accounting effects of capital expenditures and acquisitions, certain hedging instruments and other accounting treatments, items which may vary for different companies for reasons unrelated to overall operating performance and liquidity. In evaluating Adjusted Net Income available to common stockholders and Adjusted Earnings per Share, you should be aware that in the future we may incur expenses that are the same as or similar to some of the adjustments in this presentation. Our presentation of Adjusted Net Income available to common stockholders and Adjusted Earnings per Share should not be construed as an inference that our future results will be unaffected by unusual or non-recurring items.

(1) Items to consider for comparability include gains and charges. Gains positively impacting Net Income available to common stockholders are reflected as deductions to Adjusted Net Income available to common stockholders. Charges negatively impacting Net Income available to common stockholders are reflected as increases to Adjusted Net Income available to common stockholders.

- (1) Daily charter rates are gross, unless stated otherwise. Amounts set out for current daily charter rate are the amounts contained in the charter contracts.
- (2) Charter terms and expiration dates are based on the earliest date charters could expire.

- (3) Following scrubbers' installation, the daily rate will be increased from the current daily rate of \$43,000 until the original earliest redelivery dates of the vessels (December 2, 2023-MSC Azov and March 16, 2024-MSC Amalfi). The charters will also be extended for 3 years.
- (4) This charter rate will be earned by *MSC Ajaccio* until February 1, 2024. From the aforementioned date until the expiry of the charter the daily rate will be \$35,300.
- (5) Following scrubbers' installation, the daily rate will be increased from the current daily rate of \$42,000 until the original earliest redelivery dates of the vessels (January 29, 2023-MSC Athens and February 24, 2023-MSC Athos). The charters will also be extended for 3 years.
- (6) Upon redelivery of each vessel from *Evergreen* between April 2020 and January 2021, each vessel will commence a 3 year charter with *Hapag Lloyd* at a daily rate of \$34,500. Until then the daily charter rate of each vessel will be \$41,700.
- (7) The daily rate for *Sealand Washington*, *Sealand Michigan*, *Sealand Illinois* and *Maersk Kolkata* is a base rate, adjusted pursuant to the terms of a profit/loss sharing mechanism based on market conditions until expiry of the charter.
- (8) This charter rate will be earned by *Maersk Kingston* and *Maersk Kalamata* until February 28, 2020 and April 12, 2020, respectively. From the aforementioned dates until expiry of the charter, the daily rate for each vessel will be a base rate, adjusted pursuant to the terms of a profit/loss sharing mechanism based on market conditions.
- (9) The amounts in the table reflect the current charter terms, giving effect to our agreement with *ZIM* under its 2014 restructuring plan. Based on this agreement, we have been granted charter extensions and have been issued equity securities representing 1.2% of *ZIM's* equity and approximately \$8.2 million in interest bearing notes maturing in 2023. In May 2019, the Company exercised its option to extend the charters of *ZIM New York* and *ZIM Shanghai* for a one year period at market rate plus \$1,100 per day per vessel while the notes remain outstanding. The rate for this fifth optional year has been determined at \$12,430 per day.
- (10) Based on latest shipyard construction schedule, subject to change.
- (i) Denotes vessels acquired pursuant to the Framework Deed. The Company holds an equity interest ranging between 25% and 49% in each of the vessel-owning entities.
- (ii) Denotes vessels subject to a sale and leaseback transaction.
- (*) Denotes charterer's identity and/or current daily charter rates and/or charter expiration dates, which are treated as confidential.
